About Praetorian Power Protection, LLC

Honesty, Integrity, and Accountability. These core values are the guiding principles in which Praetorian Power Protection manages internal affairs, unites its employees, as well as build authentic long-term relationships with customers.

Praetorian Power Protection was created to develop a group of specialized professionals to deliver high quality results in service and maintenance needs of today's mission critical environments. We are committed to providing our customers with Electrical Testing, UPS, PDU and ASTS maintenance in accordance with OSHA and NFPA requirements, IEEE, NETA, and industry standards.

Our vision is to grow Praetorian Power Protection as an industry leader with an elite team of experienced and electrically licensed service engineers who have been trained specifically in critical power system standards, applications, and designs in order to deliver premium services with precision and safety. Please visit <http://praetorianpower.com> for more information. The selected candidate must be authorized to work in the United States and be over 18 years old. Relocation assistance is not available for this position.

Job Summary:

The MEP Supervisor is responsible for overseeing and coordinating the mechanical, electrical, and plumbing (MEP) systems installation on a hyperscale data center project site. This role requires extensive knowledge of MEP systems, construction processes, and industry standards. The MEP Supervisor will work closely with project managers, subcontractors, and other stakeholders to ensure that all MEP activities are completed on time, within budget, and to the highest quality standards.

Key Responsibilities:

- **Project Planning and Coordination:**
 - Develop and implement MEP work plans and schedules in collaboration with the project manager.
 - Coordinate with other trades to ensure seamless integration of MEP systems with overall project plans.
 - Monitor MEP installation progress and adjust schedules as needed to meet project milestones.
- **Installation Oversight:**
 - Supervise and inspect the installation of mechanical, electrical, and plumbing systems to ensure compliance with project specifications, drawings, and industry standards.
 - Ensure all work is performed safely and in accordance with relevant regulations and codes.
 - Identify and resolve any issues or conflicts that arise during installation.
- **Quality Control:**
 - Implement and enforce quality control procedures to ensure the highest standards of workmanship.
 - Conduct regular inspections and tests to verify the proper functioning of MEP systems.
 - Document and report any non-conformance and ensure corrective actions are taken promptly.
- **Team Leadership:**
 - Lead and manage a team of MEP technicians and subcontractors, providing guidance and support as needed.
 - Conduct regular team meetings to communicate project goals, updates, and safety protocols.
 - Foster a positive and productive work environment.
- **Technical Support:**
 - Provide technical expertise and support to project teams and subcontractors.

- Review and approve MEP shop drawings, submittals, and change orders.
- Assist in troubleshooting and resolving technical issues related to MEP systems.
- **Safety Management:**
 - Ensure all MEP activities comply with safety regulations and company policies.
 - Conduct safety inspections and enforce safety protocols to minimize risks and hazards.
 - Promote a culture of safety awareness and continuous improvement.
- **Documentation and Reporting:**
 - Maintain accurate and up-to-date records of MEP installation activities, including daily logs, inspection reports, and test results.
 - Prepare and submit progress reports to project managers and stakeholders.
 - Ensure all project documentation is complete and readily available for review.

Qualifications:

- **Education:**
 - Bachelor's degree in Mechanical Engineering, Electrical Engineering, Construction Management, or a related field. Advanced degrees or certifications in MEP disciplines are a plus.
- **Experience:**
 - Minimum of 5 years of experience in MEP supervision within the construction industry, with a focus on hyperscale data centers or similar large-scale projects.
 - Proven track record of managing MEP installations on complex construction projects.
- **Skills:**
 - In-depth knowledge of mechanical, electrical, and plumbing systems and their integration.

- Strong understanding of construction processes, codes, and standards.
- Excellent organizational, communication, and leadership skills.
- Proficient in project management software and tools.
- Ability to analyze complex data and produce comprehensive reports.
- **Certifications:**
 - Relevant professional certifications (e.g., LEED AP, PMP, MEP-specific certifications) are highly desirable.
 - OSHA 30 certification and other relevant safety training.

How to Apply:

Please send resume with your contact information, salary requirements to Mimi Daniels at **mdaniels@praetorianpower.com**. All offers of employment are contingent on an acceptable background check. Salary will be commensurate with experience.
