Who We Are

Praetorian Power Protection, LLC, established in 2014, is a premier provider of electrical testing, maintenance, and inspection services. As a NETA-accredited company, we uphold the highest standards of safety, quality, and reliability. Our team of certified technicians delivers the expertise and professionalism needed to keep your electrical systems operating at their best.

What We Do

We ensure the safety, reliability, and efficiency of electrical systems across industrial, commercial, utility, and critical infrastructure sectors. Using the latest testing equipment and proven methodologies, we deliver comprehensive services that help our clients maintain compliance, minimize downtime, and operate with confidence.

SERVICES OFFERED

NETA Acceptance Testing Spec

A full range of testing services for high-, medium-, and low-voltage systems, including transformers, circuit breakers, protective relays, UPS units, and batteries. Our work confirms proper performance, identifies issues early, and supports safe, reliable operation.

NETA Maintenance Testing Spec

Routine maintenance of electrical systems, troubleshooting, and diagnostic testing to identify issues before they lead to costly failures, ensuring optimal performance and safety and minimizing downtime.

Electrical Equipment Retrofits

Outdated or unserviceable electrical components are engineered and replaced to modernize systems, improve fault protection, and reduce outage duration and replacement costs.

Partial Discharge Testing

Detects defects in medium and high-voltage cables and equipment without requiring any facility downtime. The perfect option for critical facilities that cannot take downtime.

Relay & Protection System Testing

Testing and calibration of protective relays and control circuits to ensure proper operation during faults, preventing system damage and maintaining grid stability.

Arc Flash Reduction Verification

Verifies that Arc Flash reduction system meets safety and performance standards in compliance with NEC 240.87.

ADDITIONAL SERVICES

○ Ground Fault Protection Verification

○ Infrared Thermography & Visual Inspections

○ High Voltage Testing

○ Transformer Testing & Diagnostics

○ System Inspections & Audits

○ Emergency Services

“Your diligence, teamwork and safety were key components for a quality installation. Thank you again for a job well done!”

John Sasser
Sr. Vice President
